

Description

This meter is applicable to static and dynamic test due to compact type displacement transducer, and can measure high accuracy data by high output and special stability.

Feature

- High precision and stability
- Easy installation by small size and light weight
- Easy connection with automatic measuring equipment

Specification

Type	JDP- □ □ □
Rated Capacity (mm)	50, 100
Rated Output	Approx. 5mV/V
Non-linearity	0.5% RO
Safe Temperature Range	-10 ~ 80°C
Resistance	350Ω
Recommended Excitation Voltage	Less than 2V
Safe Excitation Voltage	5V
Electrical Connection	4Core Shield

Dimension

Type	A	ØB	C	D	E
JDP-5	M2.5	6	55	175	34
JDP-100	M2.5	6	110	275	34
