

## Description

This gauge is used to measure crack displacement on the surface of concrete or structure. This gauge can be installed easy

## Feature

- Simple design
- High precision and safety
- Excellent responsibility
- Easy installation and control

## Specification

<b>Type</b>	<b>SGC-5</b>
<b>Gauge Length (Span)</b>	100mm
<b>Capacity</b>	±5mm
<b>Rated output</b>	Approx. 2.5mV/V
<b>Sensitivity(X 10<sup>-6</sup> Strain/mm)</b>	Approx. 1,000
<b>Non-linearity</b>	1% RO
<b>Temperature Range</b>	0 ~40°C
<b>Resistance</b>	350 Ω
<b>Recommended excitation voltage</b>	Less than 2V
<b>Electrical connection</b>	4 Core shield
