

Description

Model SJ-405 is the exclusive sensor tester for inclinometer, accelerometer, CRACK Gauge, Strain Gauge and Analog DC Voltage and the body is equipped with two buttons and large LCD so that anyone can handle it conveniently to read the tested data. The mode selection suitable to sensor property and the engineering unit by the mode are displayed at the same time. The external case uses good durable cabinet materials with waterproof connector and rubbers.

Components

- * SJ - 1400
- * Sensor connection cable
- * Charger

Features

- * Resolution :1 mV
- * Charging display function
- * Continuous use hour : 20 hours
- * Battery indicator
- * LCD Back-Light

Specification

Model	SJ - 1400
Sensor	Inclinometer, Accelerating meter, Crack gauge, Analog DC Vol Sensor
Measurement scope	0 ~ 2,500mV
Resolution	1mV
Accuracy	±50ppm
Operation Temp. range	-20 ° C ~ 50 ° C
Temp measure. resolution	0.1 ° C
Temp measurement range	-50 ° C ~ 80 ° C
Display	128 x 64 Dot STN Graphic LCD
Battery	3.8V Li-Ion
Charger	4.2V / 1A
Weight	0.31(0.37)kg
External dimension	L = 90 x 155 x 27mm
Mode	NCLINO ⇒ Inclinometer or tilt meter
	ACCELERO ⇒ Accelerometer
	CRACK ⇒ Crack meter
	STRAIN ⇒ Strain gauge type sensors
	Analog ⇒ Analog DC output sensors
