

Standpipe (Casagrande) Water Level Meter Tip

Description

Water level meter tip is connected with the PVC Stand Pipe to install the water level meter and it is to filter foreign substances when the underground water flows into the PVC pipe inside from the lowest bottom in earth drill. It is desirable to use the sand bag as subsidiary material to avoid filter blocking by fine particles for construction of soft ground or long-term construction.

Components

- * Filter tip
- * Coupling
- * End cap
- * Sandbag

Feature

- * PVC resin material
- * High ruggedness and water permeability

Specification

Model No.	SJ-630	SJ-631	SJ-632
Size	L=500mm	L=300mm	L=300mm
	OD(Ø)=55mm/ID=40mm	OD(Ø)=38mm/ID=32mm	OD(Ø)=24mm/ID=19mm
Weight	0.45kg	0.2kg	0.15kg
Density	40µm		
Material type	Filter tip (PVC Synthetic resin)
