

This data logger is temperature or humidity measurement system that can measure temperature or humidity without P.C through 3.2" TFT touch screen, 4GB memory, USB port. And this data logger include blue tooth system and can operate wireless data measurement.

Blue
tooth

Feature

- * GTDL-TC20 : Thermocouple
- * GTDL-TH20 : Humidity
- * Read data by excel through USB memory stick
- * Save data by absolute time interval
- * Settable each sensor offset and CJC offset
- * Wireless measurement by blue tooth
- * Independent operation and P.C by USB cable
- * settable alarm and database interlock, etc.

Specification

Model	GTDL-TC20	GTDL-TH20
Input Sensor	Thermocouple J,K,T,E,R,S	Humidity sensor
Number of channel	8 channels	4 cannels
Display	3.2" TFT Touch LCD	
Internal data memory	4GB Data Memory	
Data save interval	2sec, 5sec, 10sec, 30sec, 1min, 5min., 10min, 30min	
Interface	Bule tooth	USB
Power	DC12V	USB
Dimension	110(W) * 170(D) * 35(H)mm	
Program	Multiscan S/W & Multiload S/W
